

Analysis Center

A picture may be worth a thousand words, but in the hands of an expert analyst who can provide context and insight; it can be worth infinitely more. Using direct access to DigitalGlobe’s satellite constellation, combined with the ability to exploit on-demand a vast and ever growing archive of global data in our ImageLibrary, DigitalGlobe’s Analysis Center experts help you to see the full picture.

Features & Benefits

Informed Response

Gain insight to see the full extent of the situation and effectively plan possible courses of action.

Rapid Notification

Receive the earliest possible insight into business, military, environmental, and political changes that impact people globally.

High Quality Analysis

Customers can trust that the analysis they receive is prepared by a team of professional, certified geospatial experts.

Worldwide Reach

Local as well as international governments and businesses can monitor specific areas and operations to gain insight into large scale projects or events; from city-wide infrastructure development to disaster recovery.

Rapid Mobilization

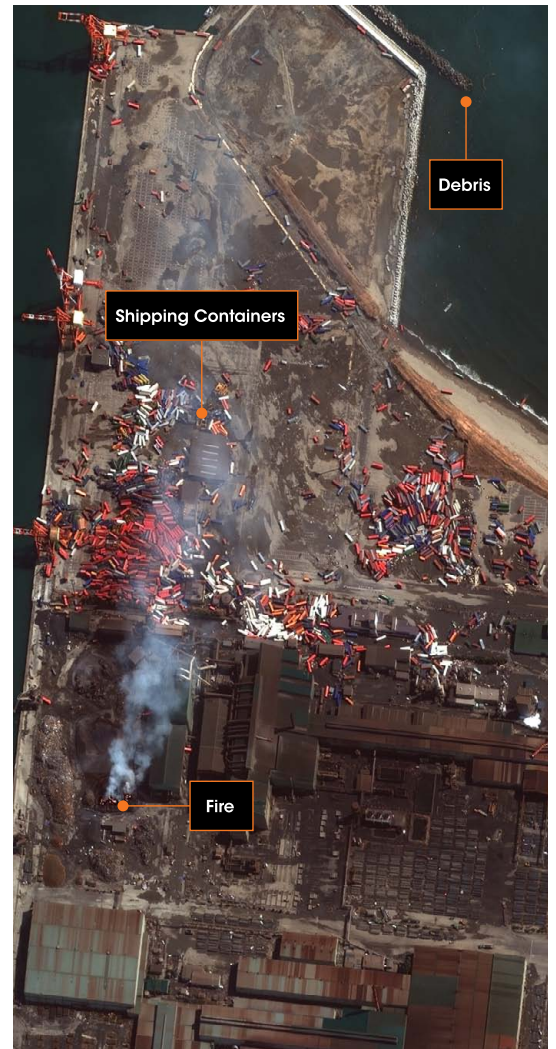

Customers receive imagery analysis to help mobilize quickly and efficiently; saving lives, resources, and time.

Multiple Source Data

Satellites, radar and airborne sensors, open source content and social media combine to provide the most comprehensive understanding of what’s developing, and what needs attention.

Historical Context

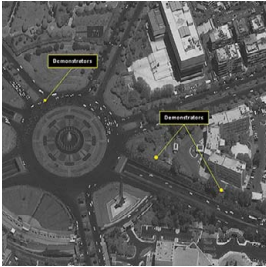

Direct and immediate access to both the before and after imagery is essential to provide customers with the full story of what has changed.

Sendai, Japan, Port Facility damaged by tsunami
Collected April 22, 2011

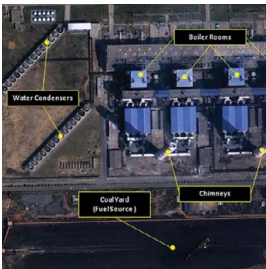

Analysis Center

Analysis Offerings

FirstWatch

FirstWatch is an imagery analysis product that provides rapid and easy access for emergency response, monitoring of staging areas and damage assessments.

AssuredWatch

AssuredWatch is an imagery analysis-based monitoring product that provides context, perspective and situational awareness of specific areas selected by the end user and proactively monitored by DigitalGlobe's constellation of satellites.

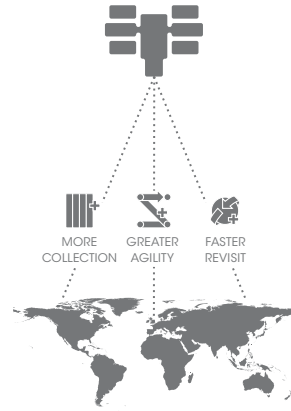

AssuredInsight

The geospatial imagery analyst team provides a detailed report of areas most important to end users. Using imagery analytics and open source research, DigitalGlobe's Analysis Center provides detailed analysis and insight into implications of change.

Custom Projects

Customers may contact the DigitalGlobe Analysis Center to tap into the most advanced geospatial analysis resources for nearly any imagery information requirement.
